Sr. No.	Technical Specifications are given below
01	<p>neXlev-solitaire-Bee hive</p> <ul style="list-style-type: none"> ● Product Area:- 23 Ft X 16 Ft ● Safe Play Area:- 28 Ft X 22 Ft ● Age Group:- 3 yrs To 12 yrs. <p>Roto Platform 5 feet ht. -:</p> <ul style="list-style-type: none"> ● Roto deck platform is made up of LLDPE. ● The Size of platform is 1160 mm x 1160 mm. ● Flange width of platform is 85 mm. ● 25 mm x 3 mm dimples are embossed on platform for antiskid surface. ● 25 NB GI pipe frame is used to support the deck. ● Deck pipe is made up of 100 NB GI. ● 100 NB GI vertical pipe of having maximum length of 3400 mm is used. <p>Roto level 5 feet ht. -:</p> <ul style="list-style-type: none"> ● Roto level is made up of LLDPE. ● Riser of level is 152mm. ● Width of the level is 780mm. ● Height of the Level is 5 feet. ● Level railing is made up of 25 NB GI pipe. <p>Roto 5 feet Glide -:</p> <ul style="list-style-type: none"> ● The Glide module is made up of LLDPE plastic. ● Width of the Glide is 650 mm. ● Depth of the Glide is 240 mm. ● The length of the Glide is 3440 mm.

- Glide modules have internal stiffeners for strength & rigidity.
- S-Glide is directly attached to the roto platform.

Roto Straight Tube Glide 5 feet ht. –:

- Glide is made up of LLDPE. Slide is supported by 'T' support, made up of 80 NB GI pipe & 40 NB GI pipe.

Roto Double Slide Entry –:

- Glide entry is made up of LLDPE material in rotational molding.
- The Glide entry is supported by 25 NB GI pipes with nylon clamps.
- Length is 950 mm & height is 750 mm.

Roto Cliff Hiker 5 feet Ht. –:

- The center pipe is made of 25 NB GI pipe. Roto cliff pods of different colors are attached for climbing purpose.

Roto Robo Shade –:

Robo shade is made up of LLDPE Roto molded plastic. The shape is of Ro

02

neXlev -Escapade-Crossette

- Product Area: - 36 Ft X 29 Ft
- Safe Play Area: - 42 Ft X 35 Ft
- Age Group: - 3 yrs To 12 yrs

Roto Crown Shade:

- Crown shade is made up of LLDPE roto molded plastic. This is in round shape.
- Dia of crown canopy Is 7'7" & height is 6'11".

Rock Hiker 7 feet ht. –:

- A laminated sheet is used for the rock Hiker.
- The laminated sheet rests on a metal frame.
- These laminated sheets are fitted on 40mm x 40mm square pipes.
- The size of the laminated sheet is 1020 mm x 2400 mm.
- Rock holds are bolted to the laminated sheet.

Roto Straight Open Glide 5 feet ht. -:

- The module is made up of LLDPE.
- The inside dimension of the Glide will be 420 mm.
- The length of the Glide will be 3155 mm.
- This is a double wall Glide, having 5-6 mm thickness on each wall.
- Glide modules have internal stiffeners for strength & rigidity.
- Glide is supported by T-support made up of 40 NB GI pipe

Roto curve open Glide 5 feet ht. -:

- The module is made up of LLDPE.
- The inside dimension of the Glide is 420 mm.
- The length of the Glide is 2637 mm.
- This is a double wall Glide, having 5-6 mm thickness on each wall.
- Glide modules have internal stiffeners for strength & rigidity.
- Glide support is made up of 40 NB GI pipe.
